

NETSCAPE

### Federal Computer Week Cites Netscape as Industry Software Leader in 1999 Survey

Netscape was hailed as a leader in information technology products and services in the government market by *Federal Computer Week*, a major federal IT news publication, subscribed to by over 66,000 federal government IT decisionmakers.

Netscape was named as the No. 1 leader in software, as well as one of the top five leading companies in overall competitiveness, named along with Hewlett-Packard, Cisco, Intel and Gateway. It was also one of the top four companies federal customers were most likely to have had a contractual relationship with.

*Federal Computer Week's* fourth annual survey of government subscribers measured their perceptions of leading information technology product and service vendors. The 1999 survey encompassed over 300 hours of interviews with 1,212 subscribers who were asked to rate 93 leading information technology companies for their contract performance, customer satisfaction, and quality of supplied products.
